PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, CGPA 8.14/10, results awaited) with hands-on backend experience in Java and Spring Boot. Trained through Capgemini's industry-backed Java Full Stack Developer Training Program. Built a secure e-commerce backend and an AI-powered facial verification system with blockchain as a final-year project. Solved 350+ LeetCode problems. Seeking an entry-level Software Engineer / Java Developer role.

EDUCATION

B.Tech, Computer Science and Engineering (IoT & Cyber Security including Blockchain Technology) 2022 – 2026
Manakula Vinayagar Institute of Technology | CGPA: 8.14/10 (through 7th Semester)

Sri Sankara Vidyashramam Matriculation Higher Secondary School, Puducherry

- Higher Secondary (Class 12) — 75.83% 2021 – 2022
- Secondary School (Class 10) — 74.4% 2019 – 2020

TECHNICAL SKILLS

- Programming Languages:** Java
- Web Technologies:** HTML, CSS, JavaScript
- Frameworks & Backend:** Spring Boot, REST API Development, JPA/Hibernate
- Databases:** PostgreSQL, MongoDB
- Operating Systems:** Linux, Windows
- Developer Tools:** Git, GitHub, Eclipse, Postman, pgAdmin 4
- Core Concepts:** OOP, Data Structures, REST API Design, CRUD Operations

PROFESSIONAL TRAINING EXPERIENCE

Java Full Stack Developer Program — Capgemini (TNS India Foundation) 2025

- Completed hands-on, industry-mentored training in Java (OOP, Collections), Spring Boot, PostgreSQL, Git/GitHub, Postman, and React — building REST APIs, integrating databases, and debugging backend applications.
- Collaborated in a 4-member team to build a Placement Management System; independently developed the College module and presented the outcome to trainers and peers.
- Completed structured professional and soft-skills training covering workplace communication and collaboration.

PROJECTS

E-Commerce Web Application — Spring Boot, PostgreSQL [GitHub](#)

- Developed secure REST APIs using Spring Boot, Spring Security, and JWT Authentication for user and admin login flows.
- Implemented role-based access control with protected admin routes for managing products and categories.
- Designed layered architecture (Controller-Service-Repository) with CRUD operations for Product, Cart, Order, Payment, and Wishlist using Spring Data JPA and PostgreSQL.
- Tested all API endpoints using Postman, verifying request-response accuracy and data persistence.

AI-Powered Facial Verification with Blockchain for Enhanced Security — AI, Blockchain [GitHub](#)

- Built a facial authentication system with Flask REST API, PostgreSQL, and DeepFace FaceNet embeddings.
- Deployed a Solidity smart contract via Remix IDE and integrated it using Web3.py for blockchain access.
- Generated SHA-256 hashes of facial embeddings and stored them on Ganache blockchain for data integrity.
- Verified users via bcrypt password checks and cosine similarity matching, detecting unauthorized tampering.

CERTIFICATIONS & ACHIEVEMENTS

- Solved 350+ coding problems on LeetCode, strengthening problem-solving and debugging skills.
- Java, MySQL Intermediate (Skill Certification) — HackerRank, 2025
- Responsive Web Design Certification — freeCodeCamp, 2026
- MongoDB Basics — MongoDB University, 2024 (Atlas, Compass, CRUD, Aggregation)
