SUMMARY

Computer Science graduate (results awaited) with hands-on experience in Java and Spring Boot application development. Experienced in building RESTful APIs and working with databases through projects. Strong foundation in object-oriented programming, problem-solving, and backend software development.

EDUCATION

Manakula Vinayagar Institute of Technology

B.Tech – Computer Science and Engineering (IoT & Cyber Security including Blockchain Technology)

CGPA: 8.14/10 (Till 7th Semester) | 2022–2026

Sri Sankara Vidyashramam Matric Higher Secondary School, Puducherry

Higher Secondary (Class 12) - 75.83% | 2021–2022

Secondary School (Class 10) - 74.4% | 2019–2020

PROFESSIONAL TRAINING EXPERIENCE

Capgemini – TNS India Foundation (TNSIF) | Java Full Stack Developer Program | 2025

- Completed hands-on training in Java, Spring Boot, and PostgreSQL with frontend exposure.
 - Contributed to a team project by implementing modules and presenting outcomes.
 - Gained practical experience in REST API development, database integration, and debugging.
 - Completed structured soft skills training covering communication and professional skills.
-

TECHNICAL SKILLS

- **Programming Languages:** Java | **Web Technologies :** HTML, CSS, JavaScript
 - **Frameworks & Backend:** Spring Boot (REST API Development)
 - **Database :** PostgreSQL, MongoDB | **Operating Systems :** Linux, Windows
 - **Developer Tools :** Git, GitHub, Eclipse, pgAdmin 4, Postman
-

PROJECTS

1) AI-Powered Facial Verification with Blockchain for Enhanced Security | AI, Blockchain

GitHub

- Developed facial authentication using FaceNet (DeepFace) embeddings for secure user verification.
- Generated SHA-256 hashes of facial embeddings and stored them on Ethereum blockchain (Ganache).
- Deployed Solidity smart contract using Remix IDE and integrated ABI for blockchain interaction.
- Implemented cosine similarity matching with blockchain-based integrity checks.

2) E-commerce Web Application – Spring Boot | PostgreSQL

GitHub

- Developed REST APIs using Spring Boot layered architecture with validation and exception handling.
 - Designed domain models including Product, Cart, Order, Payment, User, Role, and Wishlist.
 - Integrated PostgreSQL using JPA for CRUD operations and database interactions.
 - Tested APIs using Postman to verify proper request-response handling and data persistence.
-

ACHIEVEMENTS

- Solved 350+ coding problems on LeetCode, strengthening problem-solving and debugging skills.
-

CERTIFICATIONS

- Java, MySQL Intermediate (Skill Certification) – HackerRank (2025)
- Responsive Web Design Certification -Free Code Camp (2026)
- MongoDB Basics – MongoDB University (2024): Atlas, Compass, CRUD, aggregation
